

PROFESSIONAL EXPERIENCE CONTINUED

Bosch - Lead Frontend Developer | Jul 2018 - Mar 2020

Skills: React Native, TypeScript, Java, Xcode, Google Maps API, Stripe, Redis, Firebase, WebSockets, Twilio

- Led frontend/mobile development for a B2B ride-sharing app supporting Bosch employees, corporate commuters, and internal mobility programs.
- Built scheduling, routing/maps, payments, messaging, real-time driver/rider updates, localization, and release workflows.
- Coordinated with backend, product, design, QA, and international stakeholders across US, Mexico, and Germany launches.
- Managed Apple App Store and Google Play release planning while improving release speed and operational reliability.
- Mentored engineers, defined mobile/frontend architecture, and supported real-time communication and payment workflows.

Bridg - Senior Frontend Engineer | Dec 2017 - Aug 2018

Skills: React, TypeScript, Jest, Kubernetes, Elasticsearch Schemas, API Design

- Built analytics dashboards, segmentation workflows, reporting tools, search/filtering experiences, and data visualization features.
- Helped restaurant/retail brands understand customers, segment audiences, measure campaigns, analyze transactions, and improve loyalty decisions.
- Defined frontend architecture, component patterns, API contracts, and testing standards while mentoring engineers and reviewing PRs.
- Improved dashboard responsiveness, query/search usability, maintainability, and engineering delivery quality.

Grindr - Senior Web Developer / Manager | Apr 2016 - Aug 2017

Skills: React, JavaScript, Sass, Go, Analytics, CMS, Computer Vision, Mobile Campaigns

- Built internal marketing tools, high-traffic web properties, campaign platforms, ad tooling, backend/admin tools, and analytics workflows.
- Developed an in-app ad campaign package tool that automated creative generation, resizing/cropping, metadata packaging, targeting rules, QA checks, exports, mobile handoff, and analytics integration, improving workflow efficiency by 2400%.
- Built a content website and CMS with editorial publishing, ad placement, analytics, campaign pages, and backend/admin tooling, contributing to a 300% revenue increase.
- Built Gaymoji keyboard experiences including keyboard UI, emoji/sticker asset systems, mobile integrations, campaign landing pages, app store support, analytics, and admin tools.
- Created an augmented-reality/computer-vision campaign experience where users triggered animated emoji from physical Grindr advertisements.
- Managed developers, reviewed code, planned releases, and coordinated with marketing, product, design, mobile teams, vendors, and stakeholders.

SapientNitro - Manager, Interactive Development | 2015 - 2016

Skills: JavaScript, React, Angular, Backbone, SCSS, Node.js, PHP, MySQL, Social Media APIs

- Led frontend architecture and onsite forward-deployed development for major retail and entertainment brands.
- Managed developers, estimated work, reviewed code, coordinated with design, product, and account teams, and owned delivery.
- Launched high-traffic campaigns and sites, reduced delivery time, improved maintainability, and built reusable components across clients.
